Learning Disabilities Health Facilitation Team

Supporting people with learning disabilities, carers and professionals to understand, maintain and improve physical and mental health.

We help people with things to do with Primary Healthcare.

“Primary Healthcare” means health services in the community, like:

- GPs
- Dentists
- Health Centres
- Opticians
- Chiropodists.

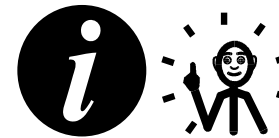

- We do training and show people how to stay healthy.

- We support people to do their Health Action Plan.

- We work with GPs to make sure people get an Annual Health Check.

- We make health information easier to understand.

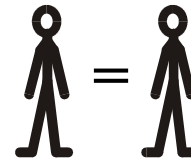

- We make sure that health services think about people with learning disabilities when they make plans.

We work with health services.

We help them to support people with learning disabilities.

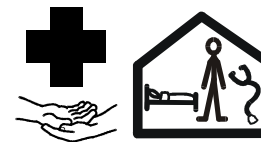

- We make sure that people with learning disabilities are treated equally and fairly by health services.

We work with people with learning disabilities.

We help them with things to do with their physical and mental health.

- We work closely with the Acute Liaison Team.

We work with carers.

We help them to support the people they care for.

- They support people with learning disabilities who have to go into hospital.
