

DEXA Scan Requests

DEXA scans for bone mineral density can be accessed directly through e-Referral (at a much reduced cost than referring to the outpatient clinic). This means that you are able to book just the DEXA scan without having to refer to the outpatient clinic. You will receive the results of the scan and be able to either support the patient within primary care or refer to the OP department if needed.

Please see the APC prescribing guidelines to support your decision making.

Further details:

- On e-Referral search for the following:
Speciality – Diagnostic Imaging, Clinic type – Bone Density Scan (DEXA)
- Cost of first OP appointment for osteoporosis and DEXA scan = £256.00
- Cost of Direct Access to DEXA scan and results = £62.73
