Updated referral forms are available for use and include guidance on the conditions seen and information required by the service. To send a referral to these services please complete a referral form and save to the patient record, then click the  Community Dietetics button below. Please make sure that the patient has given consent to share out and share in their record, and that the sharing settings have been set. Task recipient should be set to 'Dietetics Referrals North'

## Community Nutrition & Dietetics

The service accepts adult and paediatric referrals.

Common conditions accepted in adults are Nutrition Support, Diabetes managed in primary care, Irritable Bowel Syndrome and Coeliac Disease. Referrals for Nutrition support will only be accepted with a qualifying MUST score. Please note we do not provide weight management services for adults.

Paediatric referrals include cow's milk allergy, faltering growth and restricted eating related to Autistic Spectrum Disorder. The form can also be used to access our group education sessions for cow's milk allergy. Paediatric referrals are only accepted if the patient is under 5 years of age.
