## CHATSWORTH NEUROLOGICAL REHABILITATION CENTRE MANSFIELD - Rehabilitation for long term neurological conditions

### Local Partnership

*'Care sustains a person's life but  
rehabilitation seeks to transform  
it' (unknown)*

positive   
about integrated healthcare

In people with long term neurological conditions a series of time limited packages of rehabilitation may be required at different points in time, in response to changing needs.

The service provides an inpatient and community neuro-rehabilitation service for people who have a physical/ psychological disability as a result of congenital, degenerative or acquired neurological disorders/illness and trauma.

We provide a patient centred, individualised holistic approach that enables the patient to help design their rehabilitation prescription (including carers and families as appropriate); offering patient choice, through the MDT advice and guidance.

## Aims of the Service

The aim of the Community & (bed based) Chatsworth Neuro-rehabilitation Service (CNS) is to provide Nurse and Therapy led neuro-rehabilitation for the local community. In addition it will facilitate a shift in avoidable acute admissions and delayed transfers of care where appropriate from secondary care into the community and provide reactive and proactive rehabilitation support in the community. This will maintain patients' optimal functioning for as long as possible and keep or return them to their usual place of residence.

The service will allow patients to receive neuro-rehabilitation and

be supported for a short term intense period either in their usual place of residence or in a Community bed base for a maximum of 6 weeks, to restore them to their optimum level of function and to provide other such assessments appropriate to their short, medium or long term needs

Rehabilitation and reablement help patients to regain and maximise their skills and independence, including returning to work (vocational rehabilitation).

The overall aim is to provide a multi-disciplinary neuro-rehabilitation service that offers high quality, individualised, holistic support which empowers patients (with their carers and families) to participate and prescribe through an agreed plan to deliver the rehabilitation necessary to meet their needs. Our service is called Chatsworth Neuro-rehabilitation Service (CNS) and is located at Mansfield Community Hospital providing a Nurse and Therapy led service.
